1. SGPA3

1.1 Improvements

1.1.1 PBI Reports – Dumping

A new PBI Report for Vertical Sugarcane, the "Dumping" report has been implemented.

The purpose of the report is to present the number of dumps performed automatically and manually. **Automatic** dumping occurs when the *"On-Board Computer"* automatically recognizes the dumping and **Manual** occurs when the operator informs the *"On-Board Computer"* about the dumping's occurrence.

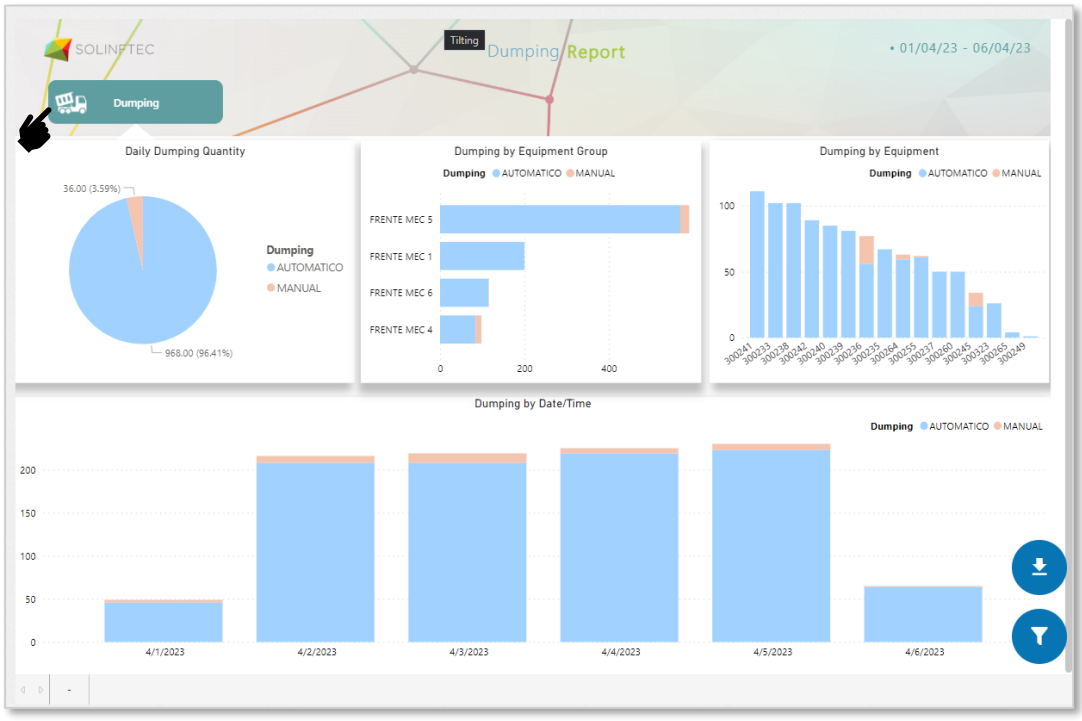

Image 01 – PBI Report Dumping

Go to Main Menu > Reports > PBI > Dumping.

Available for the Sugarcane vertical Environments upon request.

Jardim Nova York - Araçatuba/SP

1.2 Bugs

1.2.1 Monitoring - Favorites

The following corrections in the "Favorites" tool have been made:

- If the user selects filters from the Equipment menu and only opens the Favorites tool, the filters will not be deselected;

- If the user selects filters from the Equipment menu and tries to create a Favorites profile and it does not save, it will go back to the previously selected filter.

Go to Top Menu > Monitoring > Favorites

1.2.2 Maps – Export Data

Adjustment made to the "Export Data" tool of the Analytical Map so if the user exports the Area data, the "operating area" column will display data according to the language standard, that is, with a comma in Portuguese and Spanish languages and, period in English.

Go to Top Menu > Maps > Export Data > Area
