

## Changelog

### SGPA3

### Automated Process Management System

Changelog Version 2025/267

Period: 08/05/2025 to 08/18/2025

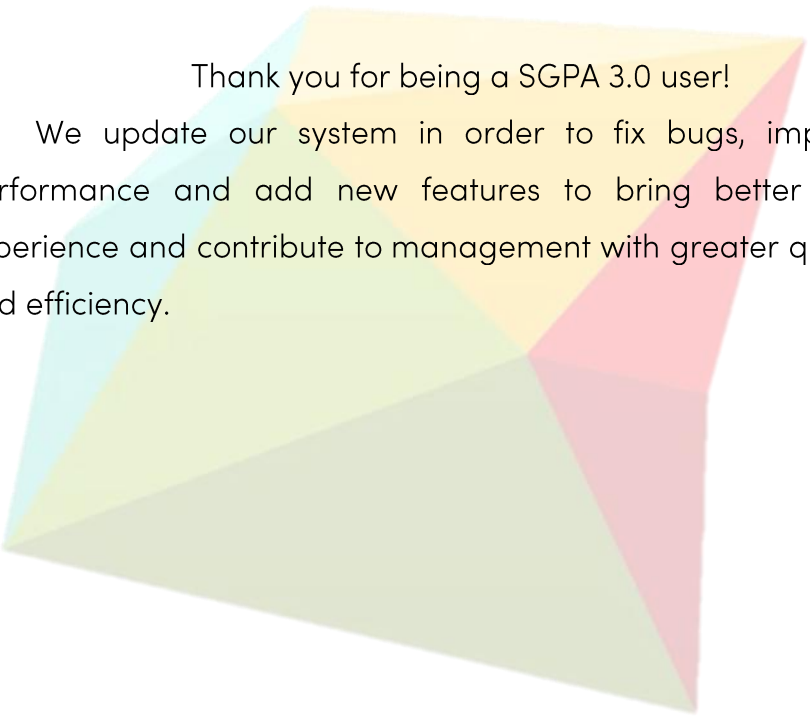

Revision 00

Date: 09/02/2025

Some applications mentioned in this report may not be available in the feature pack in your SGPA 3.0

+55 (18) 3622-2270

Av. Brasília, 2.121 - Edif. New York Tower  
Jardim Nova York - Araçatuba/SP

Thank you for being a SGPA 3.0 user!

We update our system in order to fix bugs, improve performance and add new features to bring better user experience and contribute to management with greater quality and efficiency.

## Table of Contents

1.	SGPA3.....	4
1.1	Bugs.....	4
1.1.1	PBI Benchmark – Filters .....	4
1.1.2	Equipment Records – Virtual equipment flag .....	4
1.1.3	Report Generator – Timeline Report.....	4
1.1.4	PBI Report – Efficiency.....	5

## 1. SGPA3

### 1.1 Bugs

#### 1.1.1 PBI Benchmark – Filters

Adjustment made to the Benchmark filters to display only the month/year when the selector type is month.

Go to Main menu > Reports > PBI > Benchmark > Date filter.

#### 1.1.2 Equipment Records – Virtual equipment flag

Adjustment made to the equipment record to display the "Link to a meteorological device" field (previously called "virtual device") only when the "weather station" or "rain gauge" types are selected. For other types of equipment, the field remains hidden.

Go to Side Menu > Records > Equipment > Equipment > New

#### 1.1.3 Report Generator – Timeline Report

Correction applied to the Timeline Report, to adjust the measurement to the ordering of the initial and final hourmeter/odometer correctly in chronological order.

Go to Main Menu > Reports > Report Generator > Timeline

#### 1.1.4 PBI Report – Efficiency

Adjustment made to the rounding of values in the Operator Downtime by Operation graph, to avoid errors when viewing the “Efficiency” PBI Report.

Go to Main menu > Reports > PBI > Efficiency
