

Changelog

SGPA3

Automated Process Management System

Changelog Version 2023/177
 Period: 02/20/2023 to 02/24/2023
 Revision 00
 Date: 03/06/2023

Some applications mentioned in this report may not be available in the feature pack in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Table of Contents

1. SGPA3	4
1.1 Improvements	4
1.1.1 Analytical Map – Faults	4
1.2 Bugs.....	5
1.2.1 Analytical Map – Solids	5
1.2.2 Analytical Map – Trail.....	5
1.2.3 Modules – Information	5

1. SGPA3

1.1 Improvements

1.1.1 Analytical Map - Faults

Improvement made in the visualization of the “Faults” trails map. As of this version, trails that have values greater than 0 will have a highlight view and a more robust format compared to other maps. In addition, the name of the map was changed, which will now be called “Losses”.

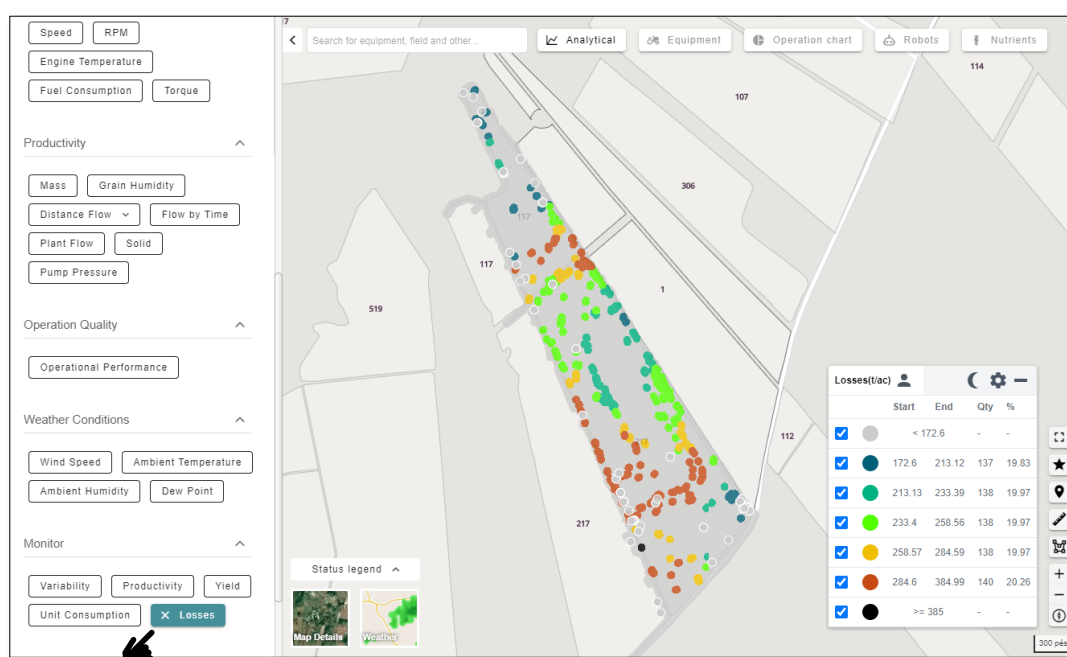

Image 01 – Losses Map

Go to Superior Menu > Maps > Monitor > Losses

Available for Sugarcane vertical environments that have the Yield Monitor Module.

1.2 Bugs

1.2.1 Analytical Map – Solids

The unit of measurement shown in the “Solids” map legend has been adjusted.

Go to Superior Menu > Maps > Solids

1.2.2 Analytical Map – Trail

Correction applied to the analytical map to display overlapping trails correctly while hiding a track in the legend.

Go to Superior Menu > Maps

1.2.3 Modules – Information

The “Information” screen has been adjusted to display the “Current situation” last record on equipment in offline status.

Go to Main Menu > Modules > Information
