### SGPA3 Automated Process Management System

Changelog Version 2022/164  
Period 10/10 to 10/14/2022  
Revision 00  
Date: 10/21/2022

Some applications mentioned in this report may not be available in the feature pack in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

## Table of Contents

1.	SGPA.....	4
1.1	Bugs .....	4
1.1.1	Mapa Analítico – Legenda .....	4
1.1.2	Mapa Analítico – Frotas.....	4
1.1.3	Mapa Analítico – Variabilidade.....	4

## 1. SGPA

### 1.1 Bugs

#### 1.1.1 Analytical Map – Legend

The legend in the Analytical Map has been adjusted to handle situations in which the data in the Quantity and Percentage columns appear as zero in some ranges and the map displays information.

As of this version, only the Mass and Yield Monitor maps (Variability, Productivity, Yield and Unit Consumption) will present information for Qty of records per track in the Standard mode legend. This information will not be available in the Custom mode legend.

This implementation aims to provide complementary information only for the types of maps where it is relevant to the analysis and data management.

 Go to Top Shortcut Menu > Monitoring

#### 1.1.2 Analytical Map – Fleets

Correction applied to the Fleet map legend in order to be possible to edit the color of the fleets.

 Go to Top Shortcut Menu > Monitoring

#### 1.1.3 Analytical Map – Variability

Correction applied to allow interpolation of Variability map data.

 Available to Vertical Cana Customers/Environments that have the Yield Monitor module.

 Go to Top Shortcut Menu > Maps
