
Changelog

SGPA3 Automated Process Management System

Version Changelog 2022/140

Period 04/18 to 04/22/2022

Revision 00

Date: 04/22/2022

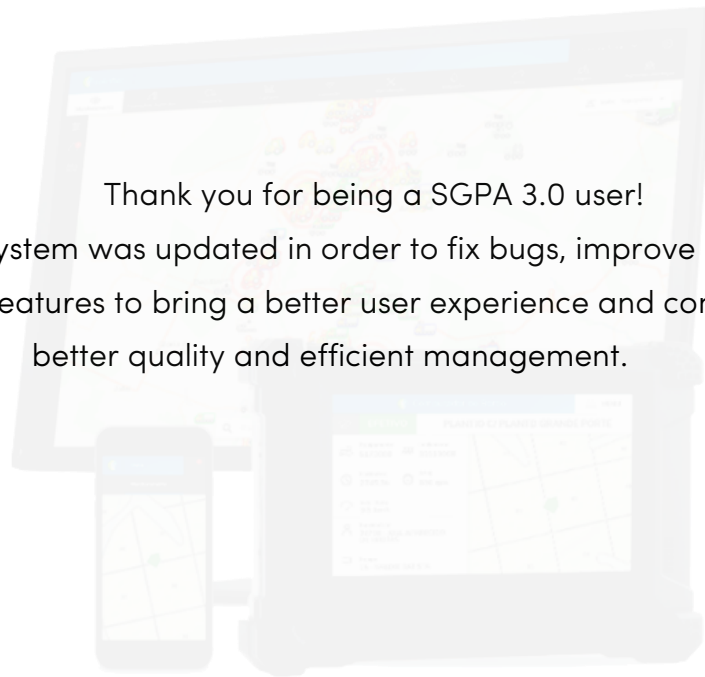

Some applications mentioned in this report may not be available in the feature pack installed in your SGPA 3.0

+55 (18) 3622-2270

Av. Brasília, 2.121 - Edif. New York Tower
Jardim Nova York - Araçatuba/SP

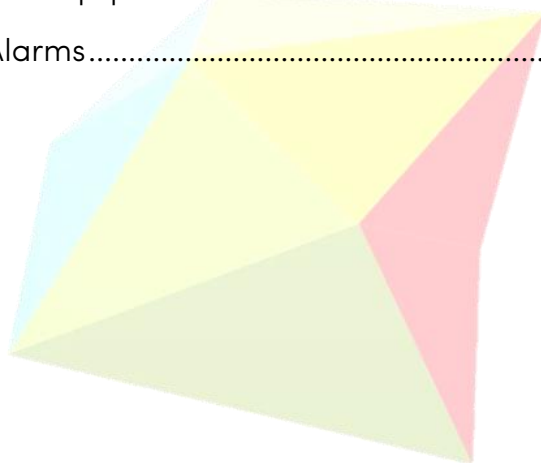

Thank you for being a SGPA 3.0 user!

Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

1.	SGPA	4
1.1	New features.....	4
1.1.1	Analytic Map – Solid Map	4
1.2	Improvements.....	5
1.2.1	Analytic Map – Flow Interpolation.....	5
1.3	Bugs.....	5
1.3.1	Analytic Map – Worked Area.....	5
2.	Monitoring.....	6
2.1	Improvements.....	6
2.1.1	Favorites – Equipment	6
2.1.2	Trail – Alarms.....	7

1. SGPA

1.1 New features

1.1.1 Analytic Map – Solid Map

Implementation of a new Line and Interpolation map. The Solid Map aims to complement the management of operations with fertilizations data.

Figura 01 – Mapas de Sólidos

i Access on upper shortcuts Menu > Maps

 Available to the Clients/Environments upon request.

1.2 Improvements

1.2.1 Analytic Map – Flow Interpolation

Implementation of new Interpolation maps to complement the Flow management data. They are: Distance Flow and Flow by Time.

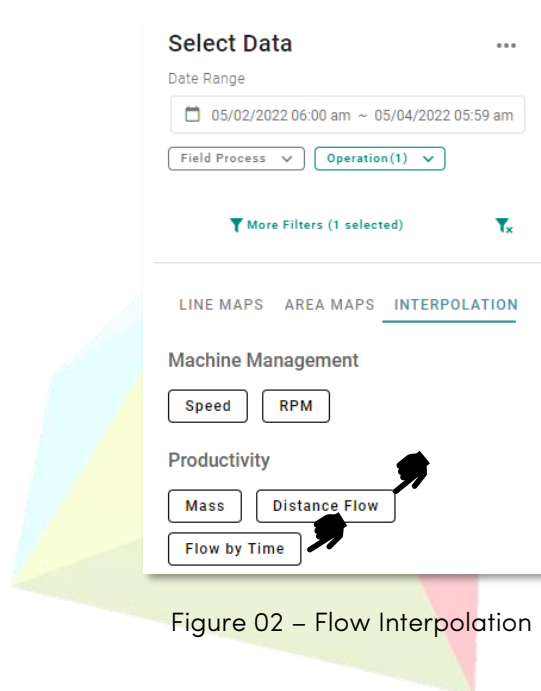

Figure 02 – Flow Interpolation

 Access on upper shortcuts Menu > Maps

1.3 Bugs

1.3.1 Analytic Map – Worked Area

Adjustment applied in the Worked Area map to show the data correctly.

 Access on upper shortcuts Menu > Maps > Worked Area

2. Monitoring

The Monitoring received some updates and adjustments related to the “layout”. This version has all the already existent features from the previous version, but with an interface more modern and intuitive. The main change is related to the integration with the Analytic Map and the update in real time (without the need to wait for the update via the timer).

Initially, for the purpose of homologation and application of eventual corrections, this version was released for some Clients/Environments. After this phase, the other Clients/Environments will be informed and will receive this update along with a training to present the main changes in relation to the previous version.

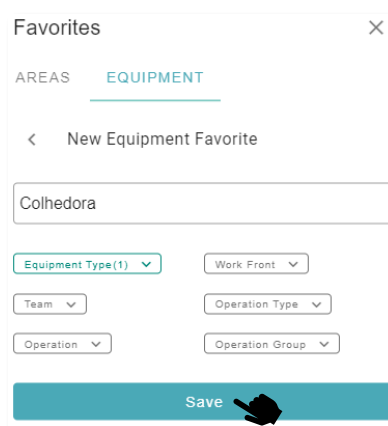

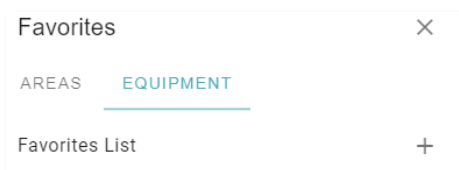

Below are the latest improvements and corrections applied to the Clients/Environments that are using the aforementioned version.

2.1 Improvements

2.1.1 Favorites - Equipment

Improvement made in the Favorite tools. From this version on it will be possible to save a favorite profile for Equipment.

To add the favorites click on “+”, insert a description, configure by filters in the desired way and click on “Save”.

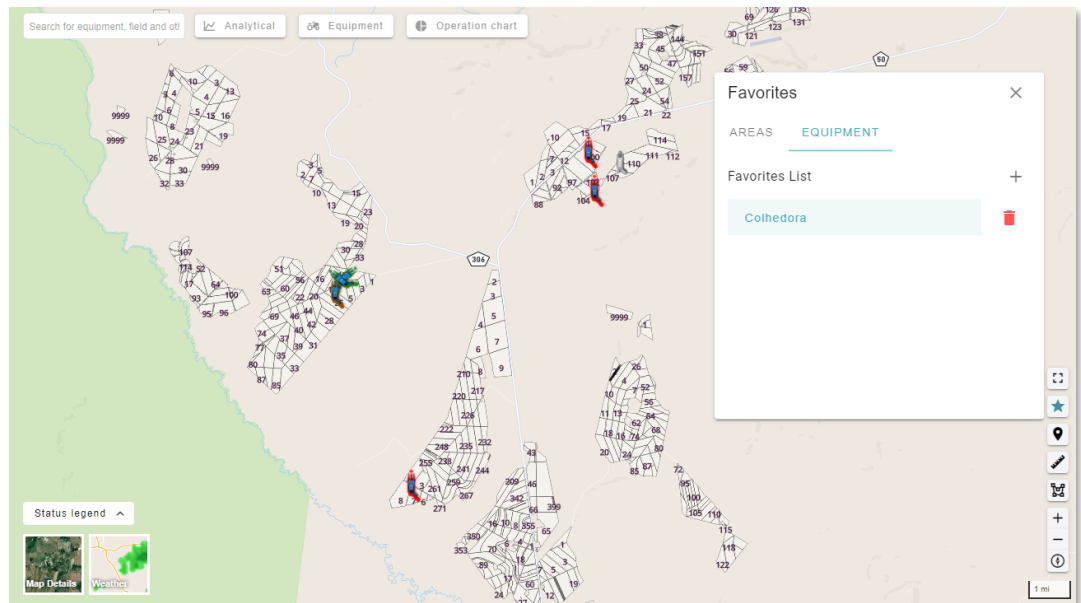

Figure 03 – Save Favorite Equipment

2.1.2 Trail – Alarms

Implementation of the “Show alarm in the trail” option.
