

Changelog

SGPA3

Automated Process Management System

Changelog Version 2023/205
 Period: 09/12/2023 to 09/18/2023
 Revision 00
 Date: 26/09/2023

Some applications mentioned in this report may not be available in the feature pack in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to management with greater quality and efficiency.

Table of Contents

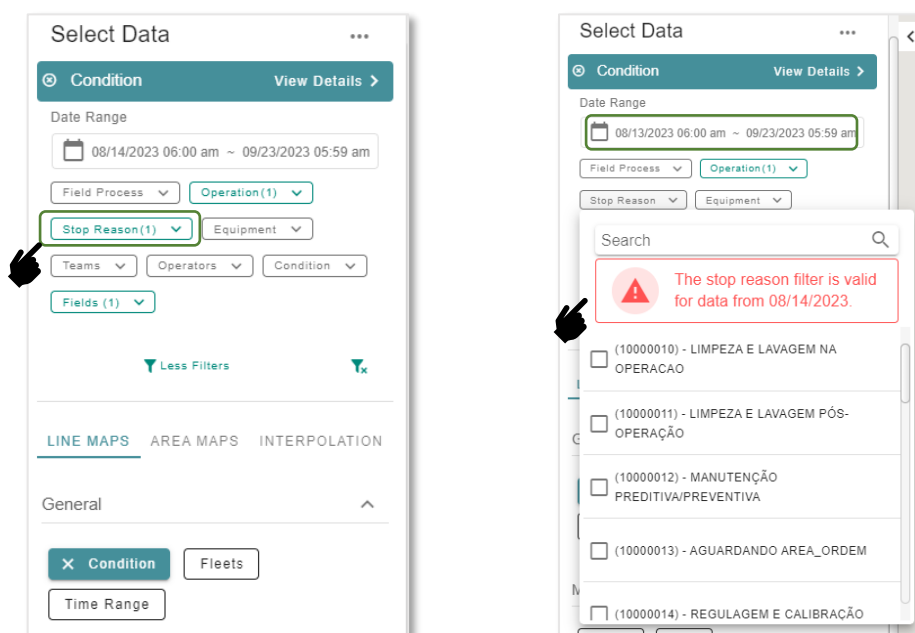

1. SGPA3	4
1.1 Improvements	4

1.2 Bugs.....	6
1.2.1 Tools – Integration	6
1.2.2 Tools – Operator File.....	7
1.2.3 PBI Reports – Benchmark Harvester and Transshipment	7

1. SGPA3

1.1 Improvements

1.1.1 Maps – Condition (Grain Vertical)

Improvement made for the **“Condition”** map. As for this version, when selecting the **Operation** and generating the **Condition** map, the new filter **“Stop Reason”** will be displayed, where it will be possible to filter only by **Stops** that you need to view on the map. The filter is valid for data from 08/14/2023, therefore, when filtering a date before that, an informative message will be displayed.

Images 01 and 02 – New filter “Stop Reason” and message informing that the new filter is valid for data from 08/14/2023.

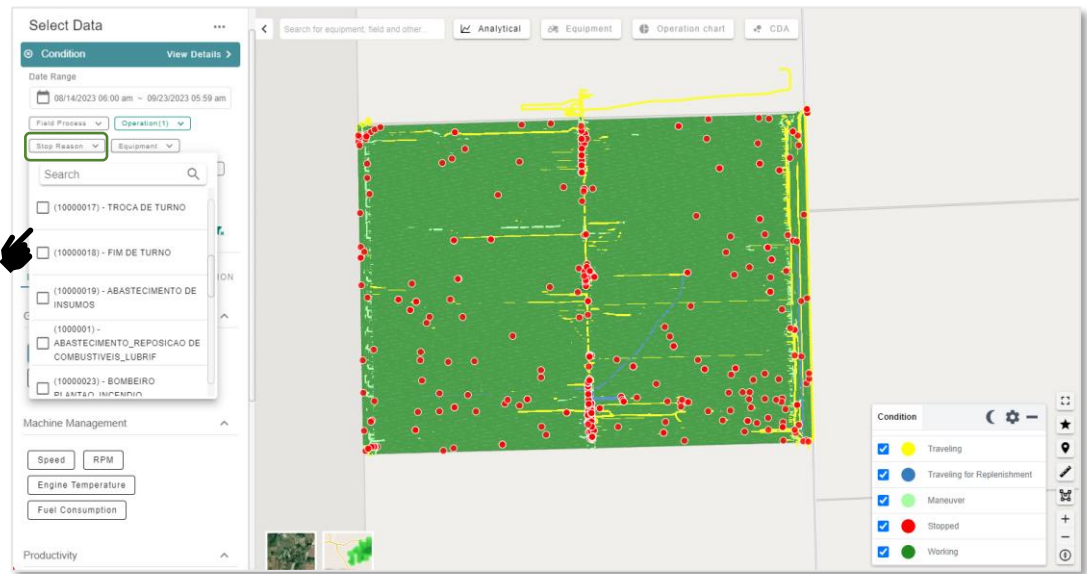

Image 03 – List of Stop Reasons in the “Stop Reason” filter.

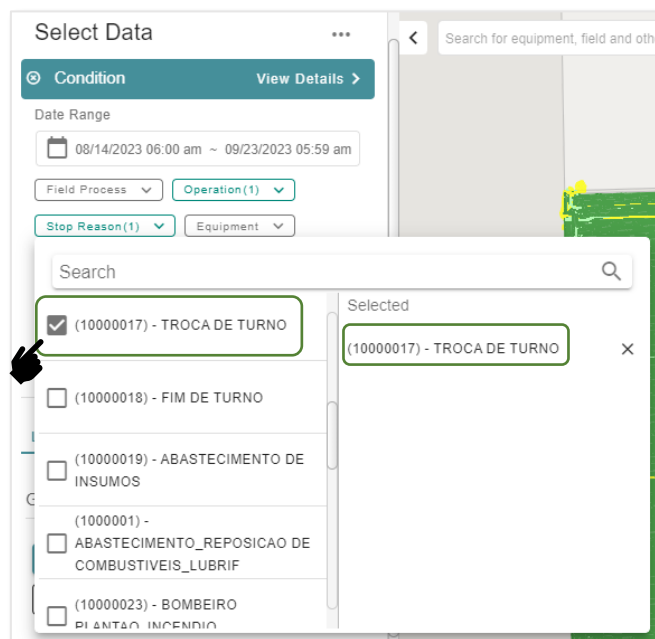

Image 04 – Stop Reason Selection

Image 05 – Stop Reason in Details and Stop points on the map.

Go to Top Menu > Maps > Line > Status > Stop Reason Filter

Available for Grain Vertical Environments. Not valid for data retroactive to 08/14/2023.

1.2 Bugs

1.2.1 Tools - Integration

Adjustment made to the “RFID Reading Report - Totem Trips” to display data in real time (D-1 hour).

Go to Main Menu > Tools > Integration > RFID Reading Report - Totem Trips

1.2.2 Tools – Operator File

Adjustment applied to the “Operator File” Tool, in the “Equipment Type” filter, to display the identifier code before the description of the Equipment Type. Furthermore, the alphabetical and numerical ordering of the filters was adjusted.

Go to Main Menu > Tools > Operator File

Applied as a hotfix on 09/21/2023.

1.2.3 PBI Reports – Benchmark Harvester and Transshipment

Adjustment made to the filters of the PBI Reports "Harvest Benchmark" and "Transshipment Benchmark" to display the “FILTER” option only after a Unit is selected. The message “SELECT A VALUE TO UNLOCK THE FILTERS” will be displayed, indicating the need to choose an option in the “UNIT” filter.

Go to Main Menu > Reports > PBI > Benchmark Menu > Benchmark Harvester and Benchmark Transshipment

Available for Sugarcane Vertical Environments. Applied as a hotfix on 09/21/2023.
