
Changelog

SGPA3 Automated Process Management System

Changelog Version 2025/270

Period: 09/16/2025 to 09/29/2025

Revision 00

Data: 10/07/2025

Some applications mentioned in this report may not be available in the package of functionalities installed in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system frequently to fix bugs, improve performance, and add new features to enable a better user experience and contribute to management with higher quality and efficiency.

1. SGPA3

1.1 Specific Enhancements

1.1.1 Records – Equipment Filter

Improvement made in the Equipment record, to implement a status filter for the registered equipment, that is, from this version onwards, a filter is displayed with the option to view All equipment, only those as Active and only Inactive.

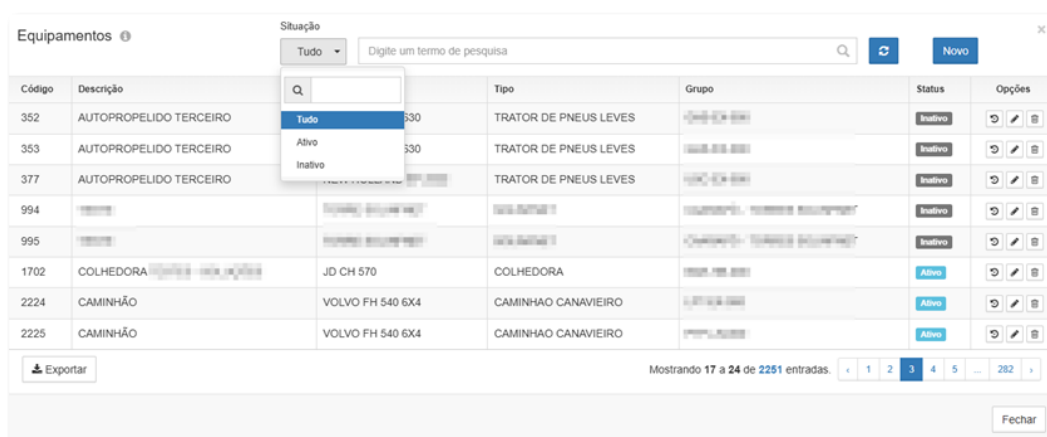

Figure 1 – Situation filter in the equipment record

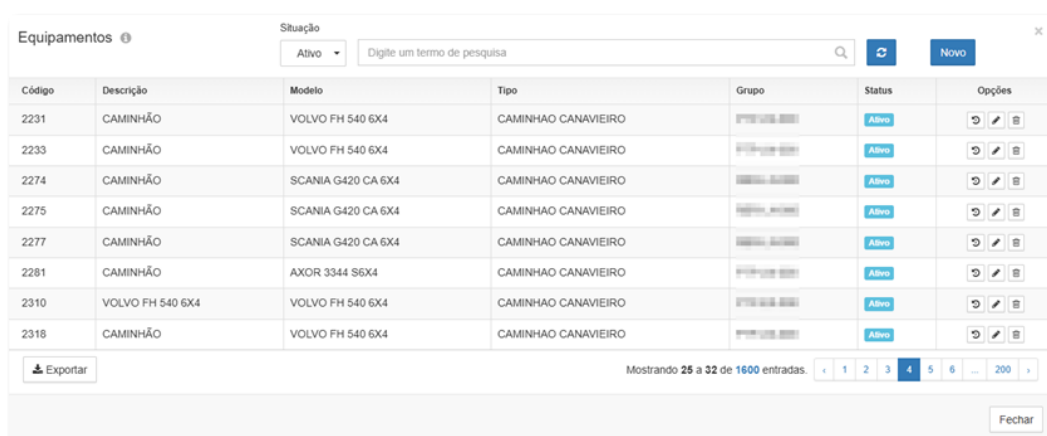

Figure 2 – Active status filter in the equipment record

Figure 3 – Inactive status filter in the equipment record

Access: Main menu > Registrations > Equipment > Equipment > Filter > All/Active/Inactive

2.1 Bugs

2.1.1 Maps – CDA

Adjustment made in the CDA module of Maps so that the Date Range filter considers the productive time of the environment.

Access: Top menu > Maps > Top menu within the map > CDA > Date Range

2.1.2 Crop Planning – Records

Applied correction to the Crop Planning Record (Meta) screen, so that there is no error when creating a plan with the operation without a linked state.

Access: Side menu > Records > Crop > Crop Planning (Meta) > "New" button

2.1.3 Maps – Multi-units

Adjustment made to the "Multi-units" solution, to avoid a problem in the display of fields when the environment has only one unit registered. To this end, a deal was implemented so that the permission to select "multi-units" is displayed only when the customer has more than one unit registered.

Access: Top menu > Maps > Top right corner of the map > Options > Active Units

Button
