+55 (18) 3622-2270

Av. Brasília, 2.121 - Edif. New York Tower
Jardim Nova York - Araçatuba/SP

Thank you for being a SGPA 3.0 user!

Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

1.	SGPA3	4
1.1	Improvements.....	4
1.1.1	PBI Reports - Menu.....	4
2.	Monitoring	4
2.1	Improvements.....	5
2.1.1	Visualization of Fields.....	5

1. SGPA3

1.1 Improvements

1.1.1 PBI Reports – Menu

Update of the PBI Reports Menu to the Sugar Cane Vertical.

- Online Command Menu will now be called Online Command and Alarms;
- Efficiency Report will enter into the Operational Hours Menu

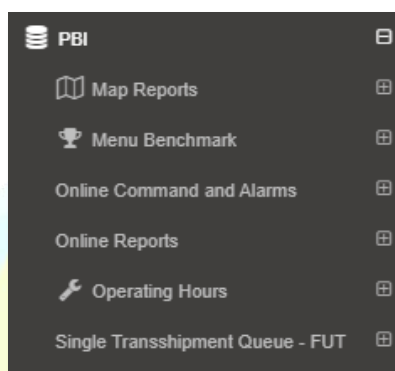

Figure 01 – PBI Reports Menu

Available to the Clients/Environments of the Sugar Cane Vertical

Access on main Menu > Reports > PBI

2. Monitoring

The Monitoring received some updates and adjustments related to the “layout”. This version has all the already existent features from the previous version, but with an interface more modern and intuitive. The main change is related to the integration with the Analytic Map and the update in real time (without the need to wait for the update via the timer).

Initially, for the purpose of homologation and application of eventual corrections, this version was released for some Clients/Environments. After this phase, the other Clients/Environments will be informed and will receive this update along with a training to present the main changes in relation to the previous version.

Below are the latest improvements and corrections applied to the Clients/Environments that are using the aforementioned version.

2.1 Improvements

2.1.1 Visualization of Fields

Improvement made to show the field descriptions from 2 km zoom.
