

## Changelog

### SGPA3

### Automated Process Management System

Changelog Version 2024/220  
Period: 03/12/2024 to 03/18/2024  
Revision 00  
Date: 03/26/2024

Some applications mentioned in this report may not be available in the feature pack in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to management with greater quality and efficiency.

## Table of Contents

|  |   |
|--|---|
| 1. SGPA3 .....                                 | 4 |
| 1.1 Improvements .....                         | 4 |
| 1.1.1 Telemetry – Recent Failures.....         | 4 |
| 1.1.2 Records – Rules – Fence/Alert.....       | 5 |
| 1.2 Bugs.....                                  | 6 |
| 1.2.1 Monitoring – Favorites .....             | 6 |
| 1.2.2 PBI Reports – Supplies Optimization..... | 6 |
| 1.2.3 PBI Reports – Fertigation Notes.....     | 6 |

## 1. SGPA3

### 1.1 Improvements

#### 1.1.1 Telemetry – Recent Failures

Improvements made to the “Telemetry” module to optimize the display of information on the “Recent Failures” cards. From this version, the information will be displayed in the following order: Equipment Front and ID, Failure Date/Time and ID – Failure Description. Furthermore, the visualization of the “Telemetry” module on mobile devices was optimized.

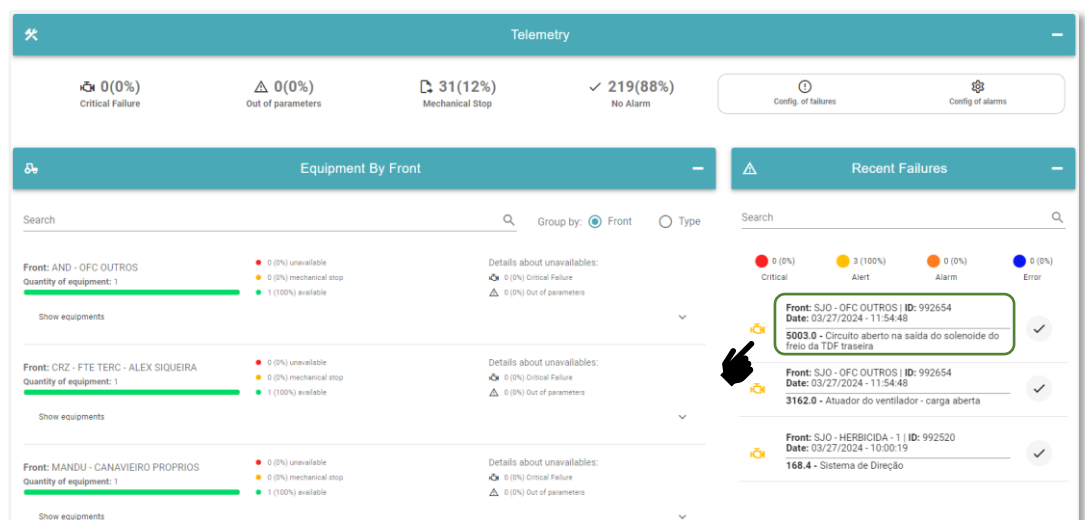

Image 01 – Failure information ordering

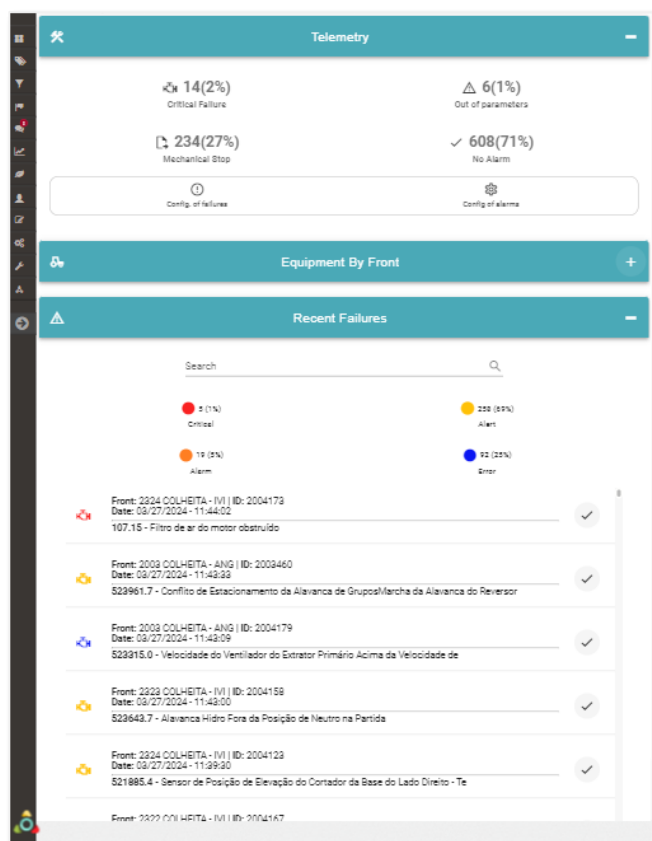

Image 02 – Telemetry module on mobile device screen

Go to Top menu > Telemetry > Recent failures.

Available for Environments that have the “Telemetry” solution.

### 1.1.2 Records – Rules – Fence/Alert

Improvement made to add “Odometer/Hourmeter” information to the alert email that is sent as on the “Rules – Fence/Alert” configuration screen.

Go to Main menu > Records > Alerts > Rules – Fence/Alert

## 1.2 Bugs

### 1.2.1 Monitoring – Favorites

Adjustment applied to the Monitoring “Favorites” filter so when selecting data in the Work Front filter in the Equipment side menu and selecting an **Area Favorites**, data will be correctly displayed in Monitoring.

Go to Top Menu > Monitoring > Equipment > Work Front Filter and Monitoring > Bottom right corner > Favorites > Area

### 1.2.2 PBI Reports – Supplies Optimization

Adjustment made to the PBI Report “Supplies Optimization”, from the Sugarcane vertical, to correctly display the values in the **“Quantity by Adherence Decision”** graph. Furthermore, in the **“Time (h) by Date/Equipment and State”** graph, it was adjusted to display only the states compatible with the solution, that is, the states **Traveling, Traveling for Unloading, Maneuver, Stopped and Working**.

Go to Main menu > Reports > PBI > Supplies Optimization > Analysis Tab > Quantity Chart by Decision Adherence and Time Chart (h) by Date/Equipment and Status

Available for Environments in the Sugarcane vertical that have the extra report “Input Optimization”.

### 1.2.3 PBI Reports – Fertigation Notes

Adjustment made to the PBI Report “Fertirigation Notes”, from the Sugarcane vertical, to display the correct translations in Spanish and English.

Go to Main menu > Reports > PBI > Fertigation Notes

Available for Environments in the Sugarcane vertical that have the extra report "Fertigation Notes".
