Av. Brasília, 2.121 - Edif. New York Tower
Jardim Nova York - Araçatuba/SP

Thank you for being a SGPA 3.0 user!

Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

1.	SGPA	4
1.1	Bugs	4
1.1.1	Tools – Work Order	4
1.1.2	Analytic Map – Worked Area	4
2.	Monitoring	4
2.1	Improvements	5
2.1.1	Trail	5
2.2	Bugs	5
2.2.1	Legend	5

1. SGPA

1.1 Bugs

1.1.1 Tools – Work Order

Correction made in the filters of the Work Order screen in order that when using the function “Clear All” the data is updated.

 Access on main Menu > Tools > Work Order

1.1.2 Analytic Map – Worked Area

Adjustment applied in the Worked Area map to show the data correctly.

 Access on main Menu > Maps > Worked Area

2. Monitoring

The Monitoring received some updates and adjustments related to the “layout”. This version has all the already existent features from the previous version, but with an interface more modern and intuitive. The main change is related to the integration with the Analytic Map and the update in real time (without the need to wait for the update via the timer).

 Initially, for the purpose of homologation and application of eventual corrections, this version was released for some Clients/Environments. After this phase, the other Clients/Environments will be informed and will receive this update along with a training to present the main changes in relation to the previous version.

Below are the latest improvements and corrections applied to the Clients/Environments that are using the aforementioned version.

2.1 Improvements

2.1.1 Trail

Improvement made in the display of the trail data. From this version the data will be displayed on the left side of the screen.

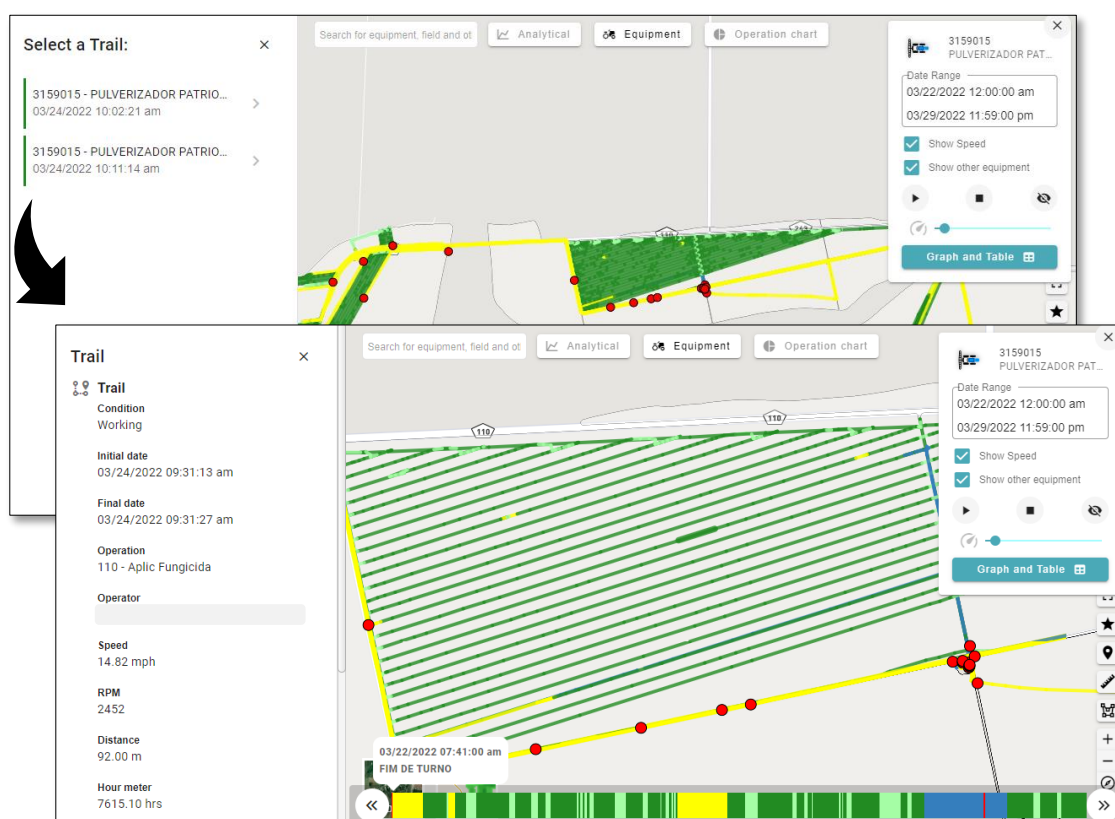

Figure 01 - Trail

2.2 Bugs

2.2.1 Legend

Adjustment made in order that the descriptions of the legends are shown correctly in the monitoring.
