

Changelog

SGPA3

Automated Process Management System

Changelog Version 2023/209
 Period: 10/10/2023 to 10/16/2023
 Revision 00
 Date: 10/24/2023

Some applications mentioned in this report may not be available in the feature pack in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to management with greater quality and efficiency.

1.1.2 Maps - Meteorology	4
1.1.3 Maps - Meteorology	4

1. SGPA3

1.1 Bugs

1.1.1 Maps – Meteorology

Adjustment made to the “Wind History” Weather Map to update data on the map while using the timeline. Furthermore, an adjustment was made to not display the timeline when the **ALL** filter is selected, as the filter presents data from all days at once, meaning there is no need to use the timeline.

Go to Top Menu > Maps > Meteorology > Weather Maps > Wind History

Available for Environments that have the “Weather” solution active.

1.1.2 Maps – Meteorology

Adjustment made to the “Weather Maps” **Label**, so the data presented in the label remains consistent with what is being displayed on the map.

Go to Top Menu > Maps > Meteorology > Weather Maps

Available for Environments that have the “Weather” solution active.

1.1.3 Maps – Meteorology

Adjustment applied to display “Evapotranspiration” data in the “Meteorology” module.

Go to Top Menu > Maps > Meteorology > Evapotranspiration

Available for Environments that have the “Weather” solution active. Applied as a hotfix on 10/23/2023. “Evapotranspiration” data is displayed after the day closing (D-1).
