Online Operational Variables

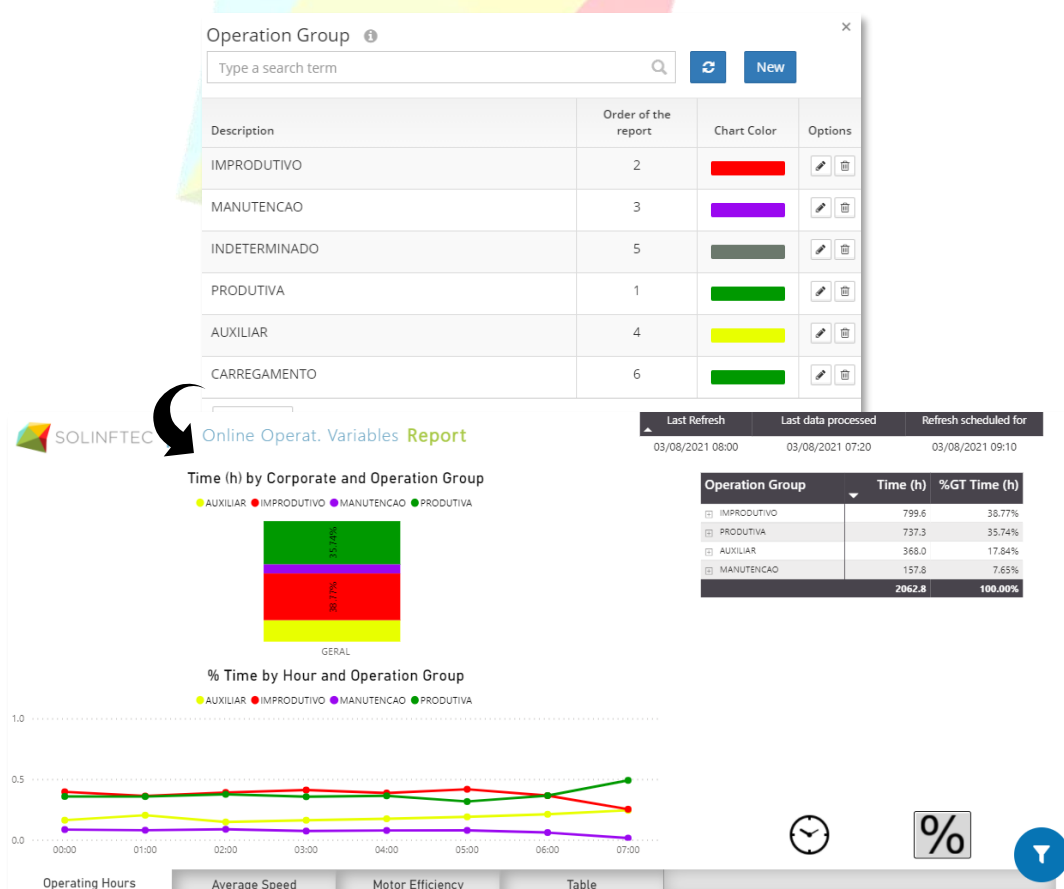

Figure 01 – Record and Report Online Operational Variables

Available for the Clients/Environments of the Sugar Cane vertical.

Access on Main Menu > Reports > PBI > Online reports and Operating Hours

1.2 Bugs

1.2.1 Maintenance – On Board Settings

Correction applied on the On Board Settings screen to allow the update of data after editing.

Access on Main Menu > Maintenance > Solinftec Maintenance > On Board Settings

1.2.2 Tools – Work Order

Correction applied in the filter “Opening Date” of the Work Order to allow filtering by the desired period and in order that when clicking on “Clear all” the applied filter is removed.

Access Main Menu > Tools > Work Order

1.2.3 Records

Adjustment applied on the record screens in general in order that when saving the data an informative message is shown only once.

Access on Main Menu > Records

1.2.4 Analytic Map

Correction applied in the calculation routine in order that when applying the equipment filter in the analytic map, the Operational Area is correctly calculated and presented.

Access on upper shortcuts Menu > Maps
