Changelog

SGPA3
Automated Process Management System

Some applications mentioned in this report may not be available in the feature pack installed in your SGPA 3.0

Thank you for being a SGPA 3.0 user!
Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

SGPA3

1.   Monitoring

The Monitoring received some updates and adjustments related to the "layout". This version has all the already existing funcionalities of the previous version, however, with a more intuitive and modern interface. The main change is related to the integration with the Analytic Map and the update in real time (without the need to wait for the update via the timer).

Initially, for the purpose of homologation and application of eventual corrections, this version was released for some Clients/Environments. After this phase, the other Clients/Environments will be informed and will receive this update along with a training to present the main changes in relation to the previous version.

Below are the latest improvements and corrections applied to the Clients/Environments that are using the aforementioned version.

1.1 Improvements

1.1.1   Icons

Improvement applied to make it easier to distinguish between Weather Station and Pluviometer.
 – Weather Station

 – Pluviometer

Figure 01 – Monitoring Icons

ⓘ Access on upper shotcuts Menu > Monitoring

1.1.2   Alarms

Implementation of the Alarm Duration Time, to view click on the Rule Information option represented by the icon "⊞ ".

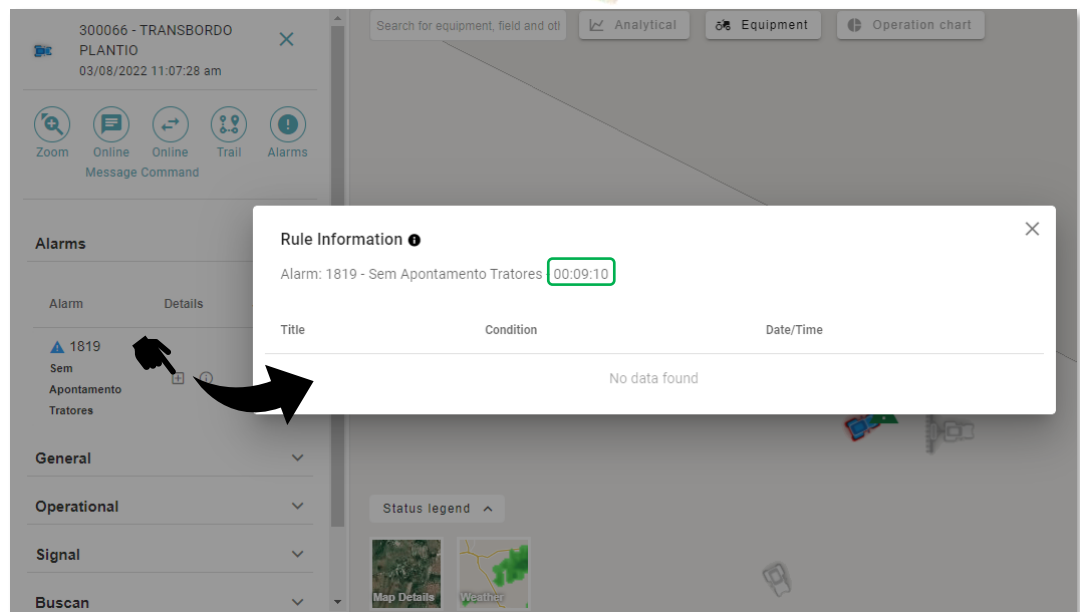

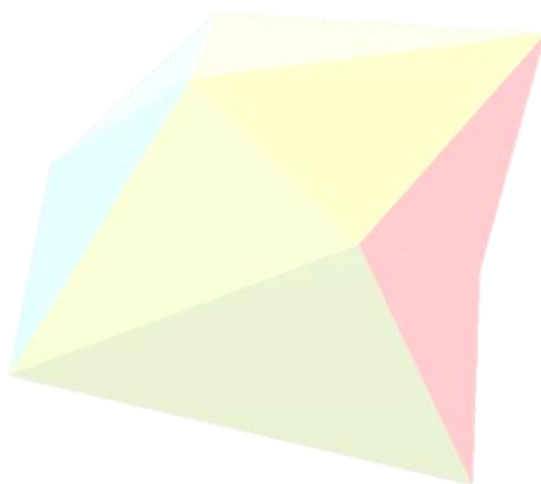

Figure 02 – Alarms

ℹ️ Access on upper shortcuts Menu > Monitoring

2.1 Bugs

2.1.1 Advanced Search

Adjustment made in order that when using the advanced search the " 📍 " icon follows the equipment when it is moving.

ℹ️ Access on upper shortcuts Menu > Monitoring > Equipment > Advanced Search
