Changelog

SGPA3
Automated Process Management System
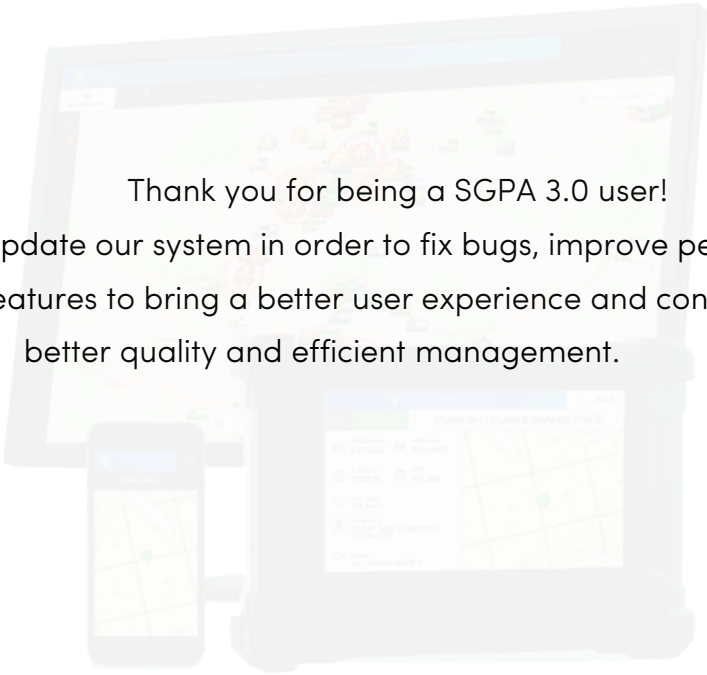

Some applications mentioned in this report may not be available in the feature pack installed in your SGPA 3.0

Thank you for being a SGPA 3.0 user!
Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

1. SGPA3

1.1 New Features

1.1.1 Monitoring

Implementation of the New Monitoring. The main change in this module was the integration with the Analytic Map and the update in real time (without the need to wait for the update through the timer), from this version both will be accessed through the "Maps" option. Adjustments related to the "layout" and this version has all the functionalities already existing in the previous version, however, with a more modern, intuitive interface and new icons.
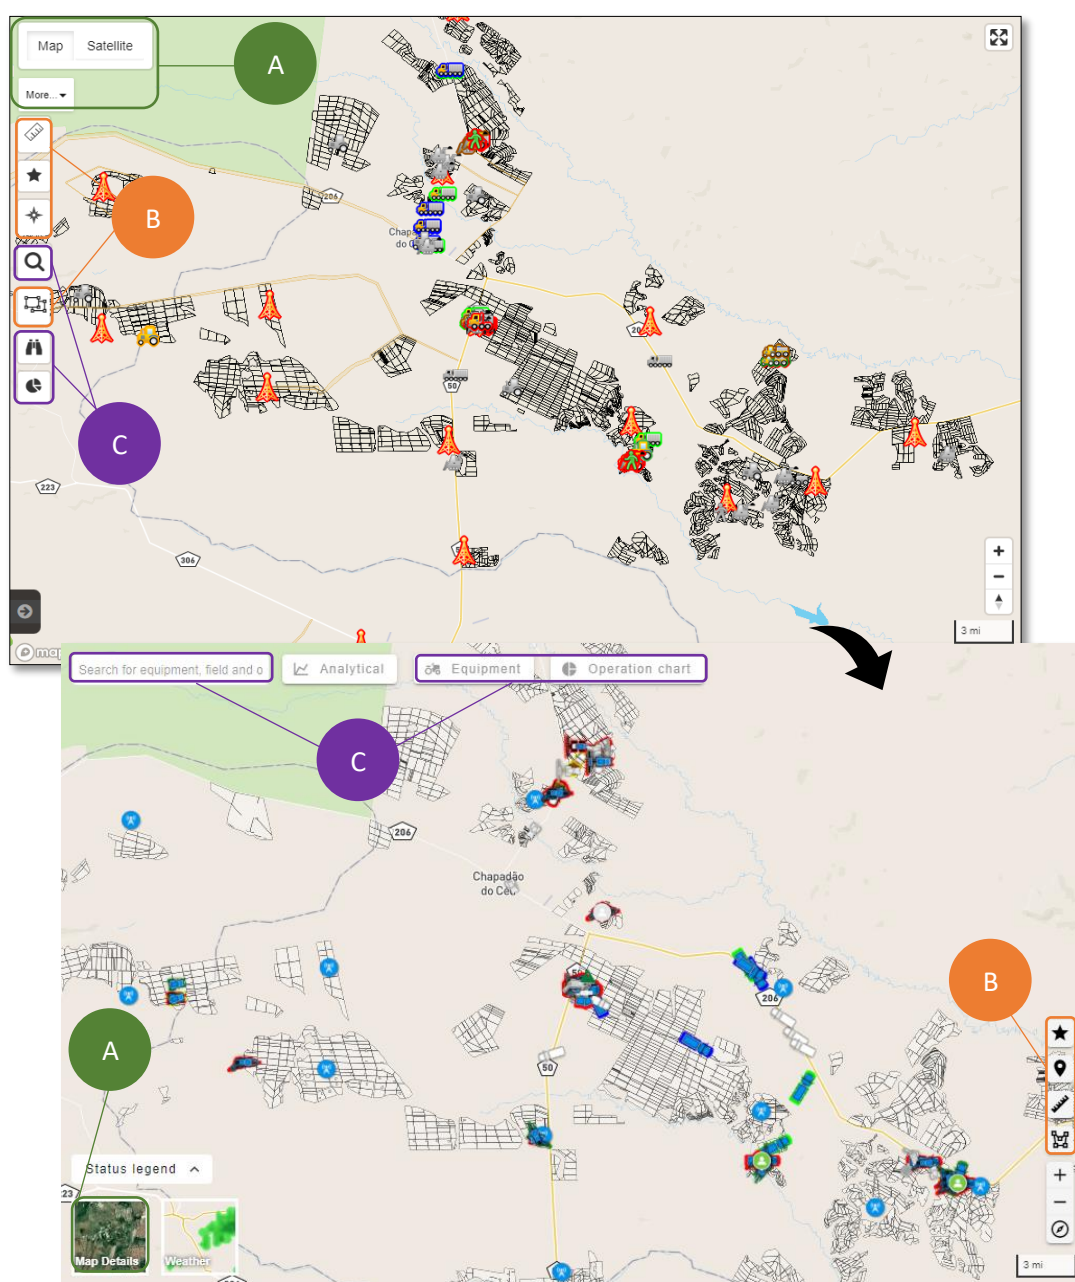

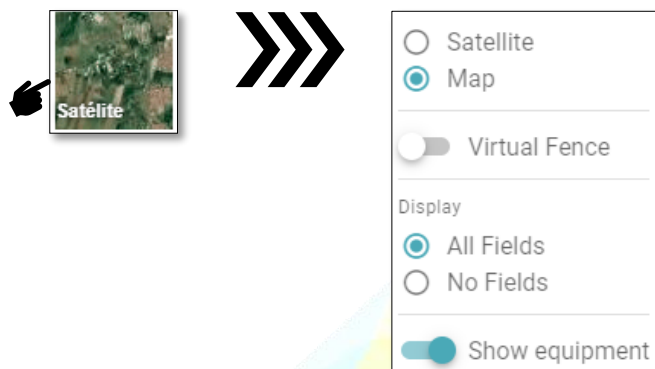

Figure 01 – Monitoring x New Monitoring

A – Visualization of the Map

The option for visualization in **Road Map or Satellite Map** mode, **Virtual Fence and Show Machines** now are available on the lower left corner of the screen.

B – **Favorites, Coordinates, Measure Distance and Draw Measures** are available on the lower right corner of the screen.

C – General Search, Equipment Search, Advanced Search and Operation Chart are available at the top of the screen.

Equipment Information

The *pop-up* of the equipment will be shown on the left side of the map.

Figure 02 – Equipment Information *(pop-up)*

More details can be found in the User Manual or by contacting the Customer Service/After Sales Center.
