Changelog

SGPA3
Automated Process Management System

Changelog Version 2021/102
Period 06/14 to 06/18/2021
Revision 00
Date: 06/18/2021

Some applications mentioned in this report may not be available in the feature pack installed on your SGPA 3.0

SOLINFTEC

Thank you for being a SGPA 3.0 user!
Our system was updated in order to fix bugs, improve performance
and add new features to bring a better user experience and contribute to a
better quality and efficient management.

Summary

1.   SGPA3

1.1   Improvements

1.1.1   Analytic Map – Time Range

Improvement made on the Time Range map label. From this version it will be possible to edit the tracks of the label in order that the periods can be customized as desired.

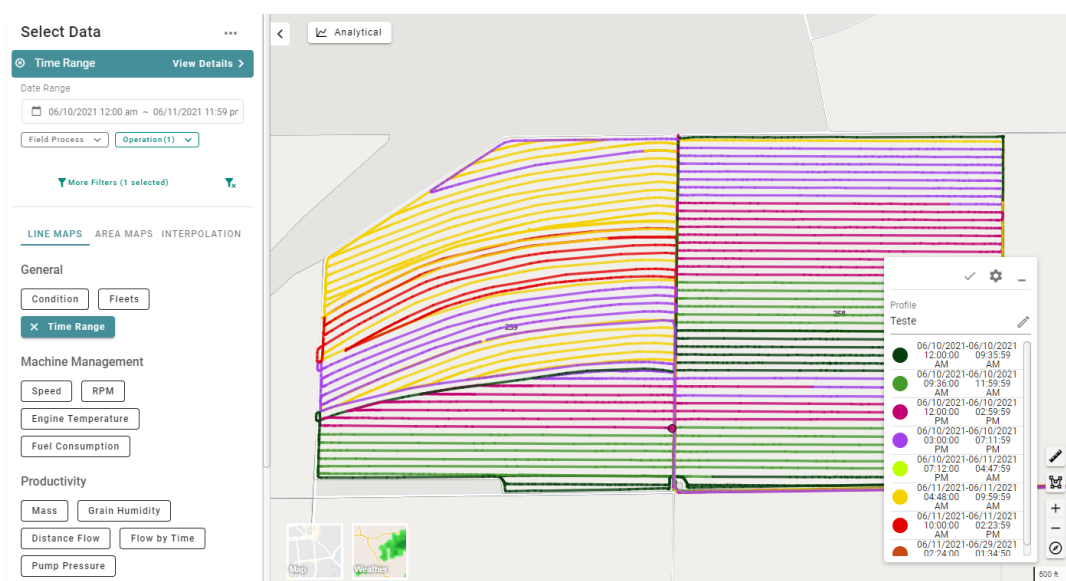

Figure 01 – Time Range Map

– To edit the label, click on the date next to the icon ' 📅 ' to open the calendar, choose the day and time you want and click on "Save";

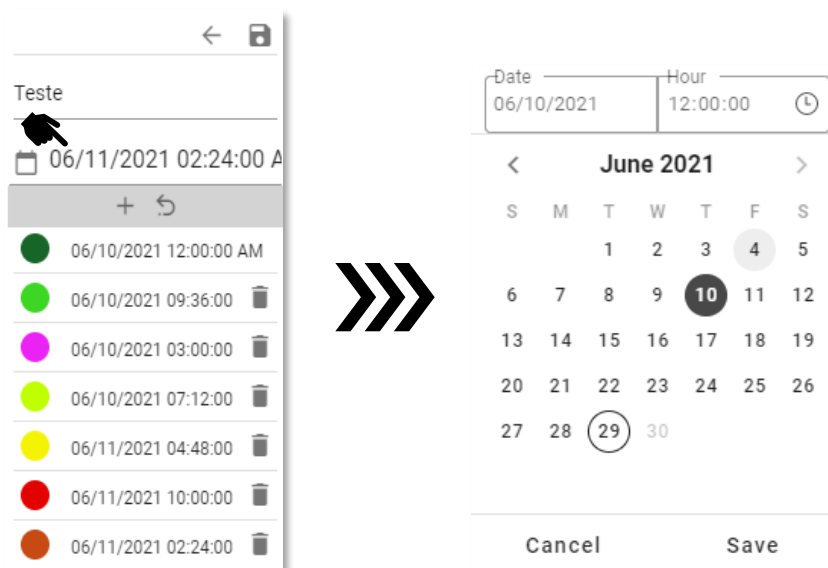

Figure 02 – Time Range Label – Calendar
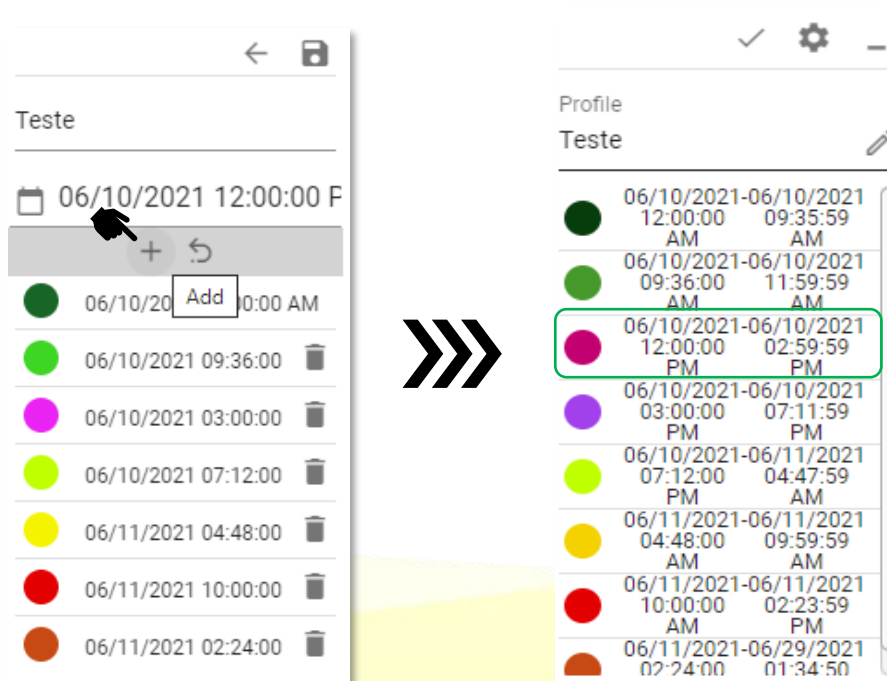

– Click on Add and then on Save (💾) and Apply (✓).

ℹ *Access on upper shortcuts Menu > Maps > Time Range*

1.1.2   *Report Generator – Supply*

Implementation of the supply type "CB turned off. Data retrieved" to complement the supply types existing in the Supply – Supply report, which includes convoy type equipment.

Figure 04 – Supply Report

💬 *Function enabled to the clients/Environments of the Sugar Cane vertical.*

ℹ *Access on Main Menu > Reports > Report generator > Supply > Headquarter/Branch/Equipment/Date – Supply (RVA001)*

+55 (18) 3622-2270
Av. Brasília, 2.121 – Edif. New York Tower
Jardim Nova York – Araçatuba/SP

1.1.3   About SGPA – Changelogs

Improvement applied on the "About SGPA" screen to make the Changelog available according to the selected language. We currently translate the files into English and Spanish.

Figure 05 – About SGPA

ⓘ *Access on upper shortcuts Menu > User > About SGPA > Changelog*

1.1.4   Meteorology – Sun Radiation

Improvement applied in the way the sun variation variable is replicated to the other equipment for greater accuracy of the readings displayed in the monitoring pop-up and in the meteorology module.
From this version the station that performs the reading will replicate to the other stations the average value calculated for each hour.

ⓘ *Access on upper shortcuts Menu > Monitoring > Pop-up > Signals tab and on upper shortcuts Menu > Meteorology > Weather Graphic*

1.2   Bugs

1.2.1   Analytic Map – Meteorology

Adjustment made in the Wind map in order that when closing the map modal and open again to perform a new search, the data is loaded.

ⓘ *Access on upper shortcuts Menu > Maps > Meteorology*
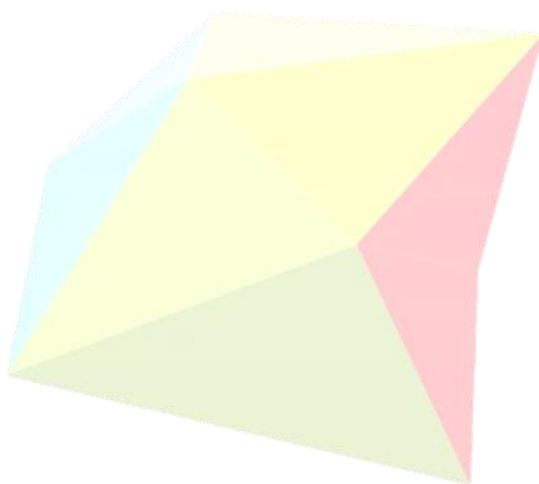

6

1.2.2 Analytic Map – Label

Correction made in the label in order that when configuring by the "Interval" distribution method, the data displayed on the map are coherent with the label tracks.

🛈 *Access on upper shortcuts Menu > Maps*

1.2.3 Records – Implement Measures

Correction applied when editing the implement measures record in order that when selecting the "0-Fixed Size" type it is possible to save.

🛈 *Access on main Menu > Records > Equipment > Implement Measures*
