Changelog

SGPA3
Automated Processs Management System

Some applications mentioned in this report may not be available in the feature pack installed in your SGPA 3.0
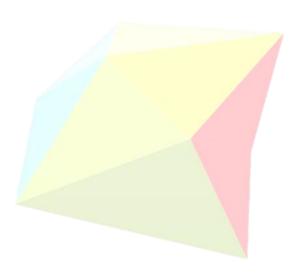

Thank you for being a SGPA 3.0 user!

Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

1. SGPA

1.1 Bugs

1.1.1 Modules – Realtime Status

Correction applied in order to show the data correctly in the Realtime Status screen when using the machines filter of the main menu.

ⓘ Access on Main Menu > machines

1.1.2 Meteorology

Adjustment made to correctly show the data in the meteorology maps and in the Meteorology Tag in the information of the Weather Stations and Pluviometers.

ⓘ Access on upper shortcuts Menu > Meteorology

1.1.3 Analytic Map – Legend

Adjustment made in the legend of the analytic map, they are:
- Implementation of the edition for the legends of Time Range and Ambient Temperature;
- Correction applied in order to correctly show the data in the map when using the field filter;
- Correction applied to correctly generate the data in the map when selecting 2 or more operations.

ⓘ Access on upper shortcuts Menu > Analytic Map
