Changelog

SGPA3
Automated Process Management System
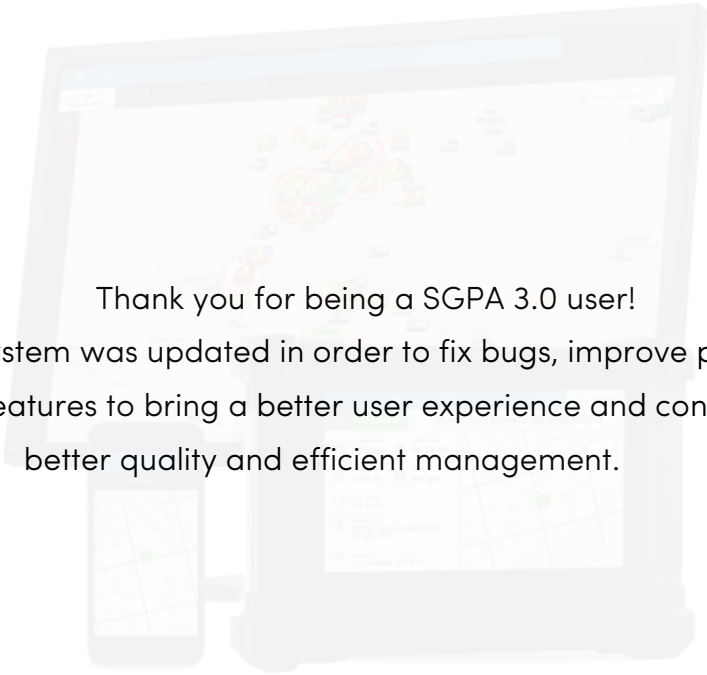

Some applications mentioned in this report may not be available in the feature pack installed in your SGPA 3.0
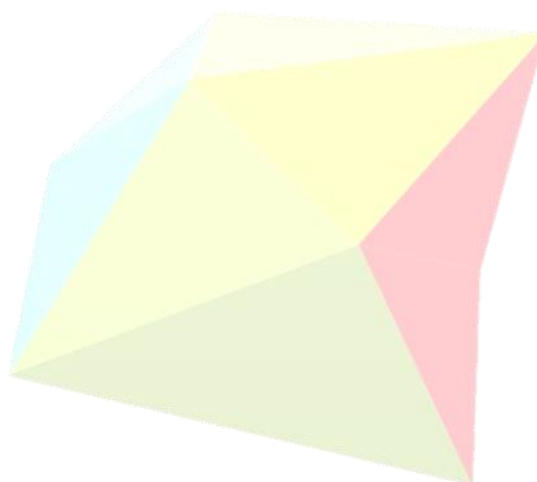

Thank you for being a SGPA 3.0 user!
Our system was updated in order to fix bugs, improve performance and add new features to bring a better user experience and contribute to a better quality and efficient management.

Summary

1. SGPA

1.1 Improvements

1.1.1 PBI Reports – Alarms

Addition of the Operation filter in the PBI **Alarms** report in order to complement the available options and facilitate the search.

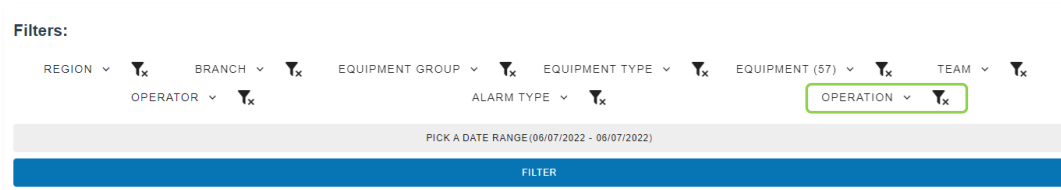

Figure 01 – Alarms Report Filters

ℹ️ Access on main Menu > Reports > PBI

1.1.2 PBI Reports – CLT

Improvement applied in the CLT report (Cut, Loading and Transport), the CLT indicators tab was added to complement and enable visualization of data according to the desired period.
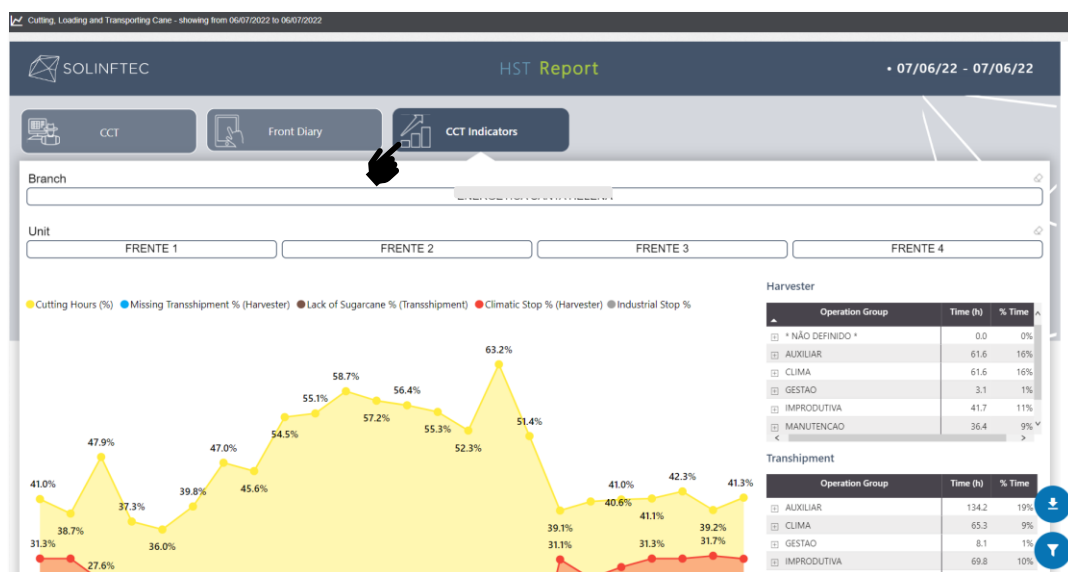

Figure 01 – CLT Report

💬 Reports available to the clients/Environments of the Sugar Cane Vertical

ℹ️ Access on main Menu > Reports > PBI

1.1.3 Alarm

Implementation of the alarm called "Active Traction" to identify when the equipment is moving with active traction.

ℹ️ Access on upper shortcuts Menu > Monitoring

1.1.4 Online Command

Update of the Implement Configure Online Command, to meet the implementation of the Active Traction alarm, the field called "Traction Alarm Speed" was added and mandatory filling of some fields was removed.

Figure 01 – Implement Config. Online Command

ℹ Access on upper shortcuts Menu > Online Command

1.2   Bugs

1.2.1   Meteorology

Correction applied in order to make the rain map load correctly when filtering by period.

ℹ Access on upper shortcuts Menu > Meteorology > Rain

1.2.2   *Tag* Meteorology

Adjustment made to show the forecast data in the Meteorology Tag and forecast period of days was extended to the next 7 days.

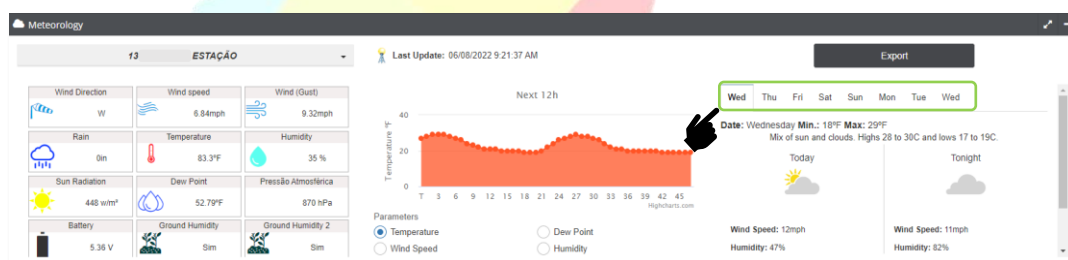

Figure 01 – *Meteorology Tag*

ℹ Access on main Menu > Dashboard > *Meteorology Tag*
