# Changelog

SGPA3

## Automated Process Management System

Changelog Version 2025/273

Period: 10/21/2025 to 11/03/2025

Revision 00

Date: 11/25/2025

Some applications mentioned in this report may not be available in the package of functionalities installed in your SGPA 3.0

Thank you for being a SGPA 3.0 user!

We update our system frequently to fix bugs, improve performance, and add new features to enable a better user experience and contribute to management with higher quality and efficiency.

Sumário

1. SGPA3

1.1 Bugs

1.1.1 Map – Monitoring

Adjustment made to the monitoring filter, where selecting an operator and applying the filter should be reflected in the display of the equipment shown.

💬 Access: Top menu > Map > Monitoring > Operator Filter > Enable showing machines in the options in the top right corner

1.1.2 Records– Station Type/Pluviometer Equipment

Adjustment made on the Station Type/Pluviometer screen to allow the record and modification of sensors without duplication in the process, as the item already recorded will be reserved and cannot be chosen again.

💬 Access: Top menu > Menu > Records > Equipment > Station/Pluviometer Type

1.1.3 PBI Report – Worked Area

Adjustment made to the filter in the PBI Worked Area Report, where selecting a zone and field will filter only the unit belonging to the selected zone(s) and field(s).

💬 Access: Side menu > Reports > PBI > Area Report > Worked Area

1.1.4 Reports – Supply Report Generator

Adjustment made to the Supply Report Generator to prevent discrepancies in values for Date, Equipment, Unit, Regional, and Corporate groupings.

💬 Access: Side Menu > Reports > Report Generator

1.1.5 Monitoring – Equipment data in Spanish

Adjustment made to the Monitoring screen so that when Spanish is selected as the language, the selected equipment pop-up correctly displays the tabs with General, Metrics, and Assets information.

💬 Access: Top menu > Monitoring > Click on a Device > Pop-up > General/Metrics/Assets tabs

1.1.6 Records– Equipment

Adjustment made to the Equipment Records screen, in the Status Filter, where it did not correctly display the records desired by the "All," "Inactive," and "Active" filters.

💬 Access: Main menu > Records> Equipment > Equipment > Status filter
