

Changelog

SGPA3 Automated Process Management System

Changelog Version 2026/279

Period: 04/15/2026 to 05/05/2026

Revision 00

Date: 06/02/2026

Some applications mentioned in this report may not be available in the package of functionalities installed in your SGPA 3.0

+55 (18) 3622-2270

Av. Brasília, 2.121 - Edif. New York Tower
Jardim Nova York - Araçatuba/SP

Thank you for being a SGPA 3.0 user!

We update our system frequently to fix bugs, improve performance, and add new features to enable a better user experience and contribute to management with higher quality and efficiency.

Summary

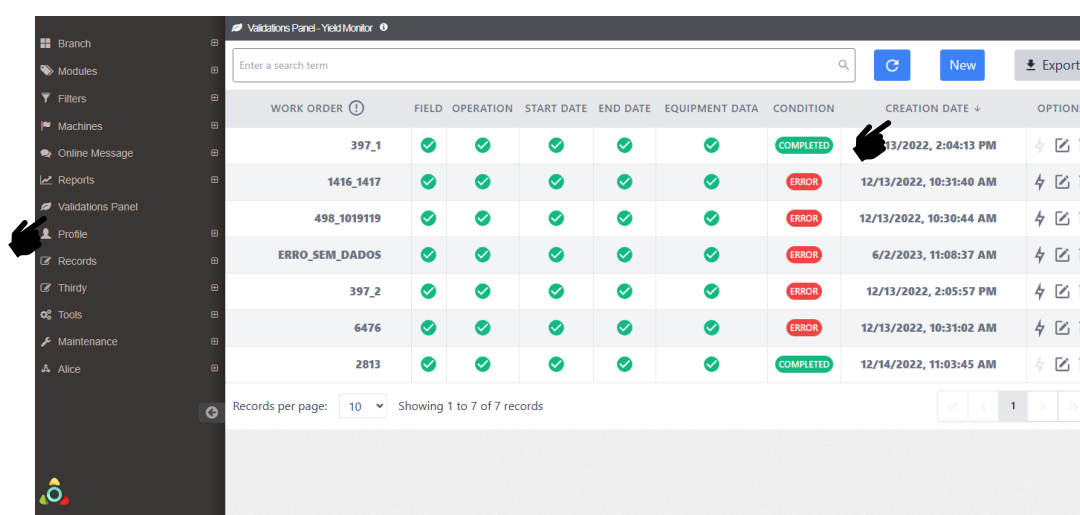

1.	SGPA3.....	4
1.1	Improvements.....	4
1.1.1	Validations Panel – WO Creation Date Column	4
1.1.2	Message – Monit+	4
1.1.3	Fertigation – Solar panel charge controller	5
1.1.4	Fence/Alert Rule – Alarms.....	6
1.1.5	Fertigation/ Irrigation – Analytical Map.....	7
2.1	Bugs.....	8
2.1.1	PBI – Operating Hours	8
2.1.2	PBI – Online Reports	9
2.1.3	Monit+ Set Layout	9
2.1.4	Monit+	9
2.1.5	Analytical Map – Adjustment	9
2.1.6	Alarm Rule – Adjustment	9
2.1.7	Rules – Fence/Alert – Adjustment	10
2.1.8	Report Generator – Tuning.....	10
2.1.9	Meteorology – Weather Maps	10
2.1.10	Monitoring	10
2.1.11	Monitoring – Advanced Search Filters.....	11
2.1.12	Registrations – Export	11

1. SGPA3

1.1 Improvements

1.1.1 Validations Panel – WO Creation Date Column

Improvement made in the Validation Panel, where the column with the date of creation of the work order (WO) was created, which allowed the implementation of the ordering of WOs by this column. As soon as you click on the name of the column "Creation Date", it should organize the table and the arrow indicates its ordering.

WORK ORDER	FIELD	OPERATION	START DATE	END DATE	EQUIPMENT DATA	CONDITION	CREATION DATE	OPTIONS
397_1	✓	✓	✓	✓	✓	COMPLETED	12/13/2022, 2:04:13 PM	⚡ 🔗 🗑
1416_1417	✓	✓	✓	✓	✓	ERROR	12/13/2022, 10:31:40 AM	⚡ 🔗 🗑
498_1019119	✓	✓	✓	✓	✓	ERROR	12/13/2022, 10:30:44 AM	⚡ 🔗 🗑
ERRO_SEM_DADOS	✓	✓	✓	✓	✓	ERROR	6/2/2023, 11:08:37 AM	⚡ 🔗 🗑
397_2	✓	✓	✓	✓	✓	ERROR	12/13/2022, 2:05:57 PM	⚡ 🔗 🗑
6476	✓	✓	✓	✓	✓	ERROR	12/13/2022, 10:31:02 AM	⚡ 🔗 🗑
2813	✓	✓	✓	✓	✓	COMPLETED	12/14/2022, 11:03:45 AM	⚡ 🔗 🗑

Figure 1 – Validations Panel – Ordering of the new Creation Date column

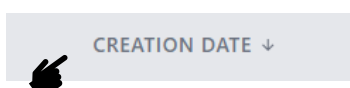

Figure 2 – New Creation Date column

Access in: Side Menu > Validation Panel

1.1.2 Message – Monit+

Improvement made to improve the usability of the Message modal within the Monit+ screen. Then when a message is sent to a device, a sending confirmation

message will be displayed, informing that the Message was successfully sent and then the modal is automatically closed.

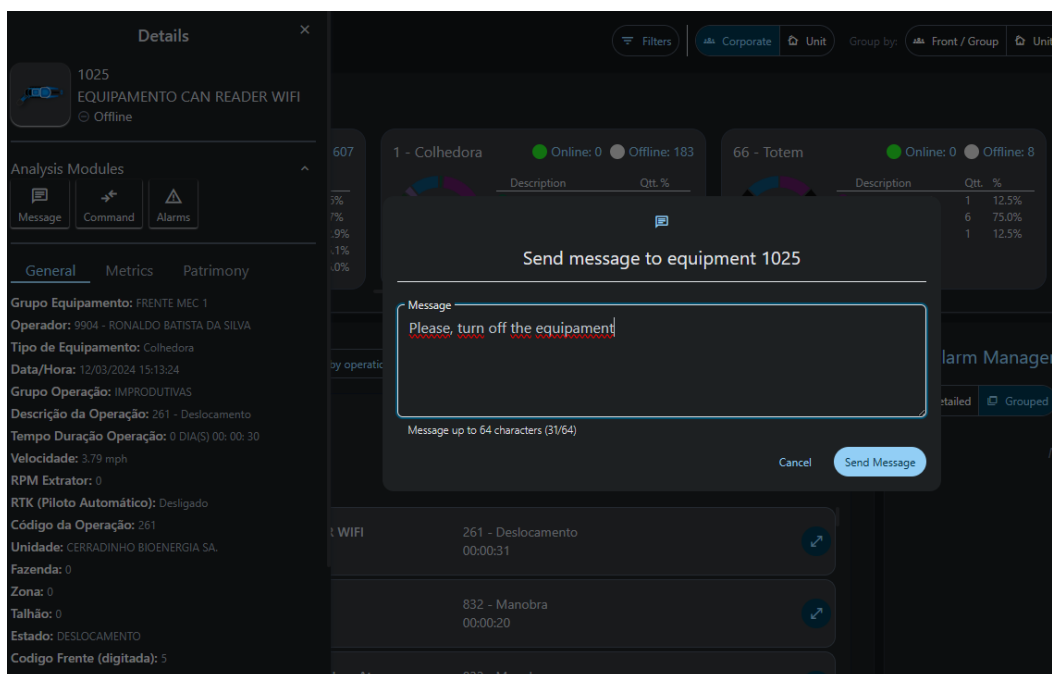

Figure 2 – Monit+ Message Modal

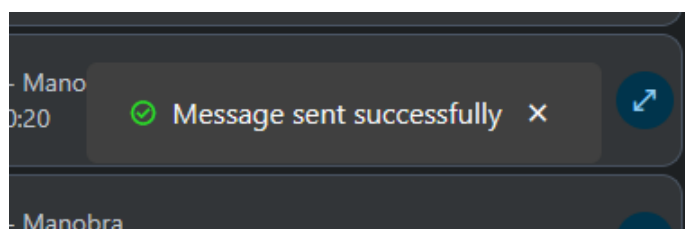

Figure 3 – Pop-up confirming that the Message was successfully sent to the equipment.

Accessed in: Upper Menu > Monit+ > Select Equipment > Message

1.1.3 Fertigation – Solar panel charge controller

Improvement made by adding new fields to the Metrics tab of the equipment (type 22 – reel, 27 – electro/moto Pump and type 29 – Pivot). These new fields will be used to display information collected from the charge controller of the aforementioned equipment.

In this way, it is possible to monitor and create alerts directly in the SGPA in Alerts > Rules – Fence/Alert. The information you add for each type will be displayed as in the following images:

GERAL	MÉTRICAS	PA
Horímetro: 4.1 horas Motor Ligado: Ligado Velocidade de Recolhimento (m/h): 0 Pressão de Aplicação: 15.76 kgf/cm² Vazão de Aplicação: 121.94 m³/h Lâmina de Aplicação: 0 mm Mangueira Restante: 0 m Valor da corrente da bateria: 0 A Valor tensão bateria: 12.02 V Nível carga bateria: 34 % Tensão consumida carga: 12.02 V Corrente consumida carga: 0 A Potência consumida carga: 0 W Valor corrente da placa solar: 0 A Valor tensão da placa solar: 0.02 V Valor potencia da placa solar: 0 W	Horímetro: 4.2 horas Motor Ligado: Ligado RPM do Motor: 650 Pressão de Aplicação: 15.73 kgf/cm² Valor da corrente da bateria: 0 A Valor tensão bateria: 12.02 V Porcentagem da carga da bateria: 34 % Corrente consumida carga: 0 A Tensão consumida carga: 12.02 V Potência consumida carga: 0 W Valor corrente da placa solar: 0 A Valor tensão da placa solar: 0.02 V Valor potencia da placa solar: 0 W	Horímetro: 0 horas Motor Ligado: Ligado RPM do Motor: 650 Pressão instantânea Pivô Linear/Central: 18.42 Valor da corrente da bateria: Indisponível Valor tensão bateria: 12.02 V Porcentagem da carga da bateria: 34 % Corrente consumida carga: 0 A Tensão consumida carga: 12.02 V Potência consumida carga: 0.12 W Valor corrente da placa solar: 0 A Valor tensão da placa solar: 0.02 V Valor potencia da placa solar: 0 W

Figure 4 – Metrics tab of the equipment (type 22 – Reel, 27 – Electro/Motor Pump and type 29 – Pivot) with the new fields.

These values can be used to create alert rules, such as an alert that sounds when the battery voltage is less than a certain value. These alerts are associated with the type of equipment, and it is necessary to create alerts for each Type and select the equipment that will use this rule.

Access in: Top Menu > Monitoring

Notes: It will be necessary to purchase a wiring harness that will connect the charge controller with the MagX through the SOL7 Screen connector (present in these equipment but not used.) All 2026 FW versions are already prepared to use the wiring harness, but we recommend versions higher than 2026.1413 due to the addition of improvements.

1.1.4 Fence/Alert Rule – Alarms

Improvement applied to the display of Fence/Alert Rule Alarms. Where Alarms are displayed according to the weight of criticality. That is, the most **Critical** alarm

is displayed at the top, followed by the Normal, **Maintenance**, and **Warning** criticality alarms.

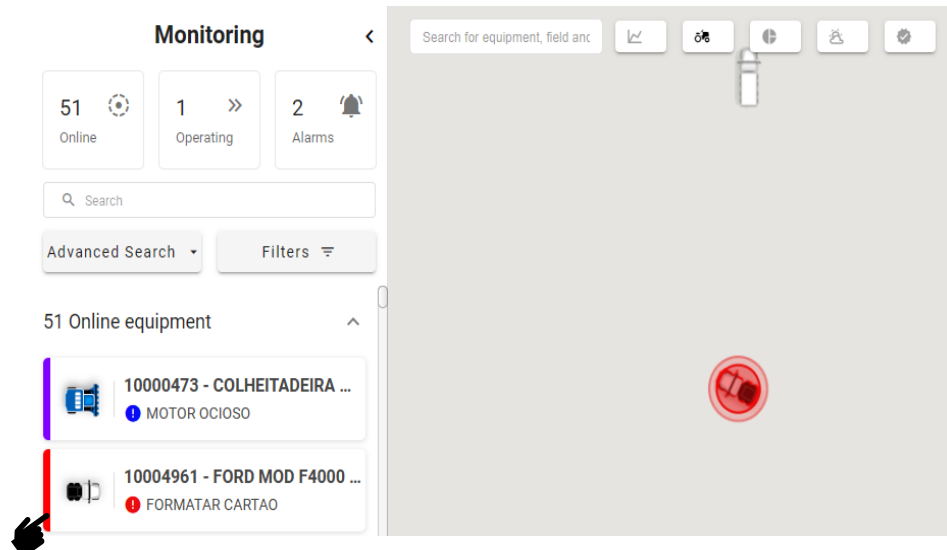

Figure 5 – List of online equipment in order of alarm criticality.

Access in: Monitoring > Analytical Map

1.1.5 Fertigation/ Irrigation – Analytical Map

Improvement applied through treatment differentiation and when the area map without fertigation application is selected. When it is Hydroroll-type equipment, it will look for the field and when it is Pivot type, it will take all the fields it has passed.

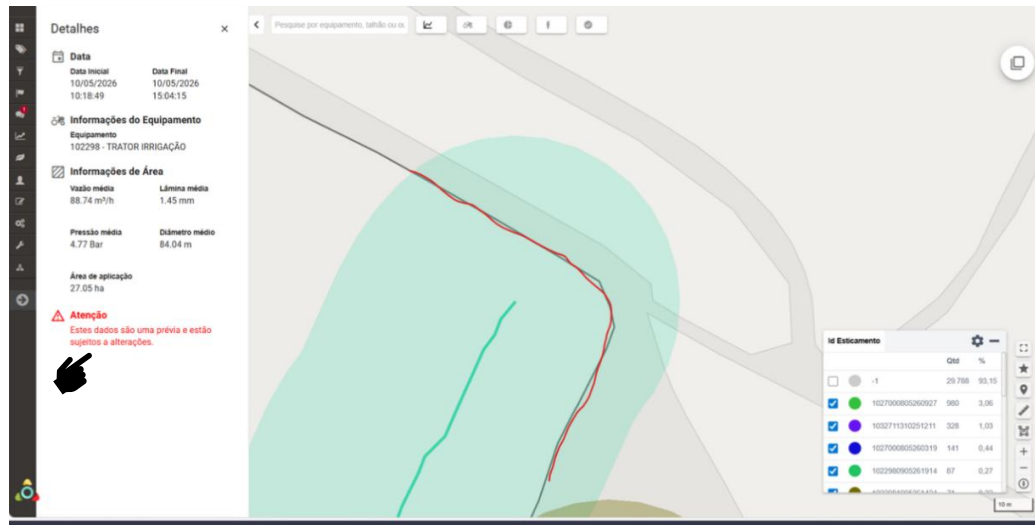

Figure 6 – Before

Figure 7 – After

Accessed in: Monitoring > Analytical Map

2.1 Bugs

2.1.1 PBI – Operating Hours

Adjustments made to the PBI Operating Hours Report, in the display of speed ranges. After this fix, the reports are displaying the information coherently.

Access in: PBI > Reports > Operating Hours > Cutting, Loading and Transporting Cane

Access in: PBI > Operating Hours > Operational Variables Reports

2.1.2 PBI – Online Reports

Adjustments made to the Online Reports PBI in Online Operational Variables, in the formatting of the Time value (h), so that it is displayed correctly in the export file.

Access in: PBI Reports > Online Reports > Online Operational Variables

2.1.3 Monit+ Set Layout

Adjustments made to the Monit+ custom layout, where after the layout is defined and then the filters are modified, the layout definition is maintained.

Accessed in: Top Menu: Monit+

2.1.4 Monit+

An adjustment has been made in Monit+ to correct a divergence in the duration values of the alarms in the tool, so when clicking to see the alarm the value is displayed correctly.

Accessed in: Upper Menu > Monit+

2.1.5 Analytical Map – Adjustment

An adjustment has been made to optimize the generation time of the data that is displayed in the Analytical Map, enabling a better user experience of Sgpa3.

Access in: Top menu > Map > Analytical Map > Data loading

2.1.6 Alarm Rule – Adjustment

Correction in the description of the Alarm Rule, after applying the adjustment the alarms are displayed correctly to the user.

Access in: Top Menu > Monitoring

2.1.7 Rules – Fence/Alert – Adjustment

Adjustment applied on saving the Fence/Alert Rule, after a change the rule changes are being saved successfully.

Access in: Side menu > Records > Alerts > Rules – Fence/Alert

2.1.8 Report Generator – Tuning

An adjustment has been implemented so that the percentage of Operating Hours is displayed again in the chart of the Management Hours Report.

Access in: Side menu > Reports > Report Generator > Management Hours > Headquarter / Brand / Equipment / Operation Group

2.1.9 Meteorology – Weather Maps

An adjustment was made to correct a slowness presented in the loading of the meteorology, in the weather rain map. After application, the map loading time has been normalized.

Accessed in: Top Menu > Map > Meteorology > Weather Maps

2.1.10 Monitoring

Adjustment in the monitoring data synchronization service that brought equipment online even without data.

Access in: Top Menu > Monitoring

2.1.11 Monitoring – Advanced Search Filters

A new filter option was added in the advanced search, allowing the consultation and segmentation of records based on the Application Blade parameter of equipment classified as Type 22 Reel. The functionality enables a faster and more accurate location of the desired configurations, facilitating analysis, validation, and operations related to this equipment.

Access in: Top Menu > Monitoring

2.1.12 Registrations – Export

A correction was made to the export document of employees' role records. Where there was an error in the export when there was an empty field. After the adjustment applied, all formats can be exported successfully.

Access in: Side menu > Records > Employees > Employees

If you have any questions or other clarifications, please contact us via email suporte@solinftec.com.br or call +55 18 3622 2270.
